

MEDIDOR DE ANILLOS

GUIA PARA CONOCER LA MEDIDA DE UN ANILLO

1. Imprimí esta hoja asegurándote que la impresora está configurada para imprimir al 100% (no escalar)

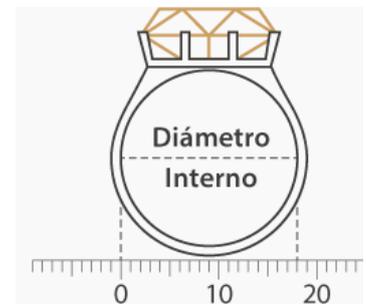

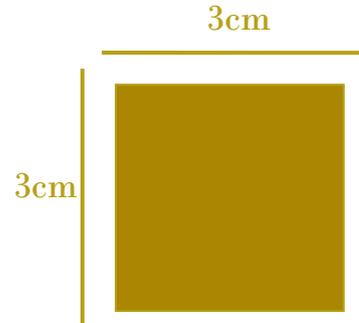

Antes de medir tu anillo fíjate con una regla que el cuadrado de la derecha mida exactamente 3 cm para saber que la guía está bien impresa y a escala

2. Busca un anillo que te quede bien en el dedo que quieras usar el nuevo anillo.

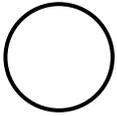

Apoya el mismo en los círculos y anda moviéndolo hasta encontrar el que coincide en tamaño. Lo que debe coincidir es el diámetro interno del anillo.

El espacio debe ser exacto para no equivocarte y siempre que tengas dudas elegí la medida más grande.

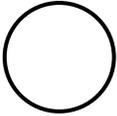

Tené en cuenta también el grosor del anillo que vayas a comprar. Si es muy grueso opta por el talla más grande
