

## Instruction Manual for YN 160 photo light

### 一 product structure

front view of the product

rear view of the product and its component name

### 二 Application method

1 Fasten YN160 photoflood lamp

Ways 1, takeoff the attached handset, then fasten it with tools(now shown).

Ways 2: fixed the hotshoe connecting rod by using plum blossom adjusting screw on the lamp base, then installed the YN160 into the hotshoe bayonet of the camera.(...-.

2, Install the battery(available battery types please refer to “° applicable battery”±

3, Press the bottom on the lower right corner of the backside of the YN160.

4, Press the “° TES”j± key to test the electric quantity of the battery. Fi -star red indication lights on means full charge capacity, In order to protect the recyclable and rechargeable battery, please renew a battery with more power when less than two-star red indication lights on.

5, Adjust the glow brightness of the YN160 according to actual circumstances  
Glow brightness of the YN160 falls into 16 levels, press the “° ”± or “--”± above the reverse side of the “° Power Level”j± button to increase or decrease the glow brightness stage by stage, and this can also released by a long press.

6, Select appropriate color filter and adjust the condenser plate angle in line with shoot requirements.

7, When shooting over, return shift knob of the YN160, folder the condenser plate, unload the batteries, and put it into PVG bag.

### 三 functional characteristics

#### High-quality

Accurate color temperature, can reach to the standard lever-5500k.

Mighty power, balanced luminance, constituted by 160 highlighted LEDs.

Energy Efficiency, low heat consumption.

Effective photo spot by all-round condenser plate and lamp cup which avoids optical waste.

### **Long-life span**

The working life for LED bulb can last more than 10000 hours.

The hotshoe connecting rod adopts efficient break-proof engineering plastic to clear clients worry.

### **Easily-use**

16 lever microcomputer dimming which apply to various light circumstance.

Support polytypic common battery and test its electric quantity.

Have automatic identification AA battery and lithium battery function.

Four PCS color filter attached, suit to all kinds of shoot atmosphere.

Can be used by fixed it on the hotshoe plug base, professional lamp holder, or tripod and also for Hand-hold use.

### **Suitable Battery**

6\*Hi-MH or 6\*AA battery , Panasonic CGR-D16S/D220 rechargeable batteries, SONY NP series rechargeable batteries

### **Item check List**

YN-160 body, Handle, Hotshoe linkage, Screwdriver, Color filter \*4,

Instruction manual, Velvet Bag.

### **Announcements**

Always keep this product from rain or damp in order to prevent fire.

To treat the battery, wrap its contact properly to avoid short and always abide by local regulations on battery.
